

RE-BELLE

THE MICROFIBRE CLOTH THAT REBELS AGAINST WASTE

FROM PET BOTTLES TO MICROFIBRE CLOTH.
LOOK AT THE **RE-BELLE JOURNEY!**

100 % RECYCLED, 100 % RECYCLABLE & 100 % CIRCULAR

The Re-belle microfiber cloth is made of 100% **recycled** material. But that is not all! With the launch of Re-belle, the circle is now fully closed. After **hundreds of washes**, the Re-belle microfiber cloth is fully **recycled** to help in the fight against waste. The cloth is then processed once again into raw materials for a second life as furniture, clothes or PET bottles, for example. The smartly designed Re-belle microfiber cloth also helps to tackle pollution in the textile industry and reduce CO2 emissions, without cutting corners when it comes to quality!

WHAT MAKES **RE-BELLE** SPECIAL?

I am made out of plastic bottles

CO₂-reduction

Recyclable

Zero packaging waste
